

Energize Your Network

Cache – Making the Difference in the Real Broadband World

Gilad Peleg, VP Marketing & BD
Presented at DCIA Conference, January 6th 2010

Newark International Airport – Jan 3rd

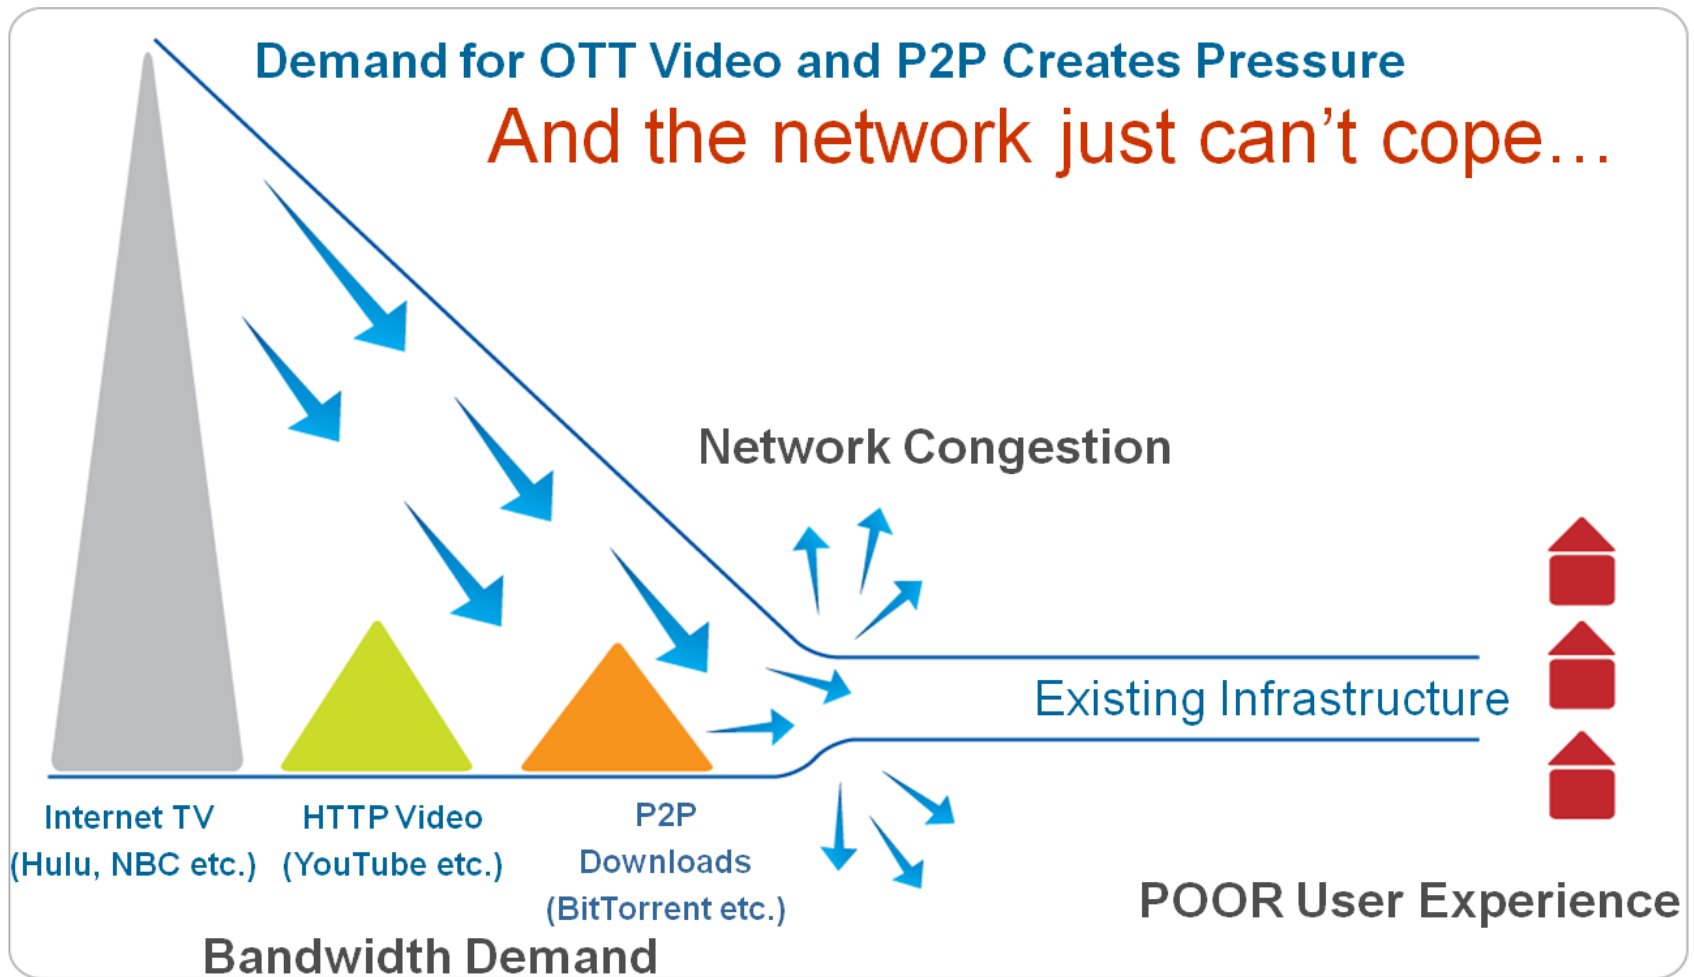

Exponential Traffic Growth

Over the next three years, users will source most of their video content from the Internet and in HD

Source: Cisco

The Bandwidth Challenge - Bottlenecks

What Needs to be Done?

- Broadband access network investment
 - \$45B next 5Y (Ovum)
 - Half of that on FTTx
- 30% of trans-Atlantic bandwidth is already utilized (Telegeography)
 - New cables are and will be deployed

U.S. Broadband Households by Nominal Data Rate

Lit versus Potential Capacity on Major Submarine Cable Routes, 2008, Telegeography

The Operator's Challenge

Online sales of media content

Operator share

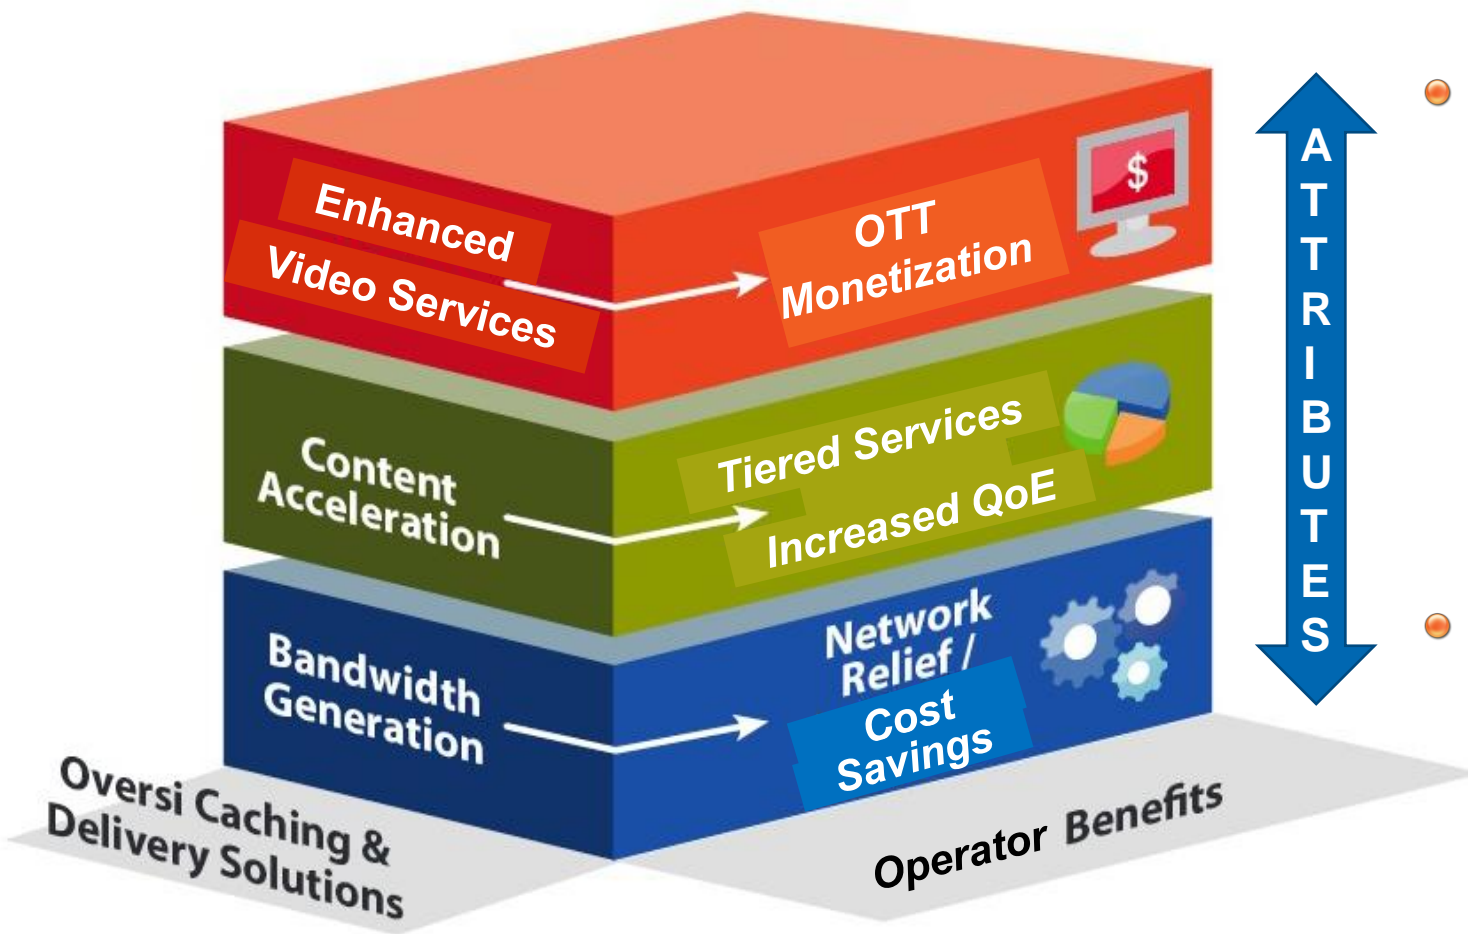

Required infrastructure investments (\$bn)

\$ billions

\$ 0

The Operator's Solution - OverCache

- Assuring User Experience

- Crucial to Broadband Networks

Case Study – APAC FTTH Operator

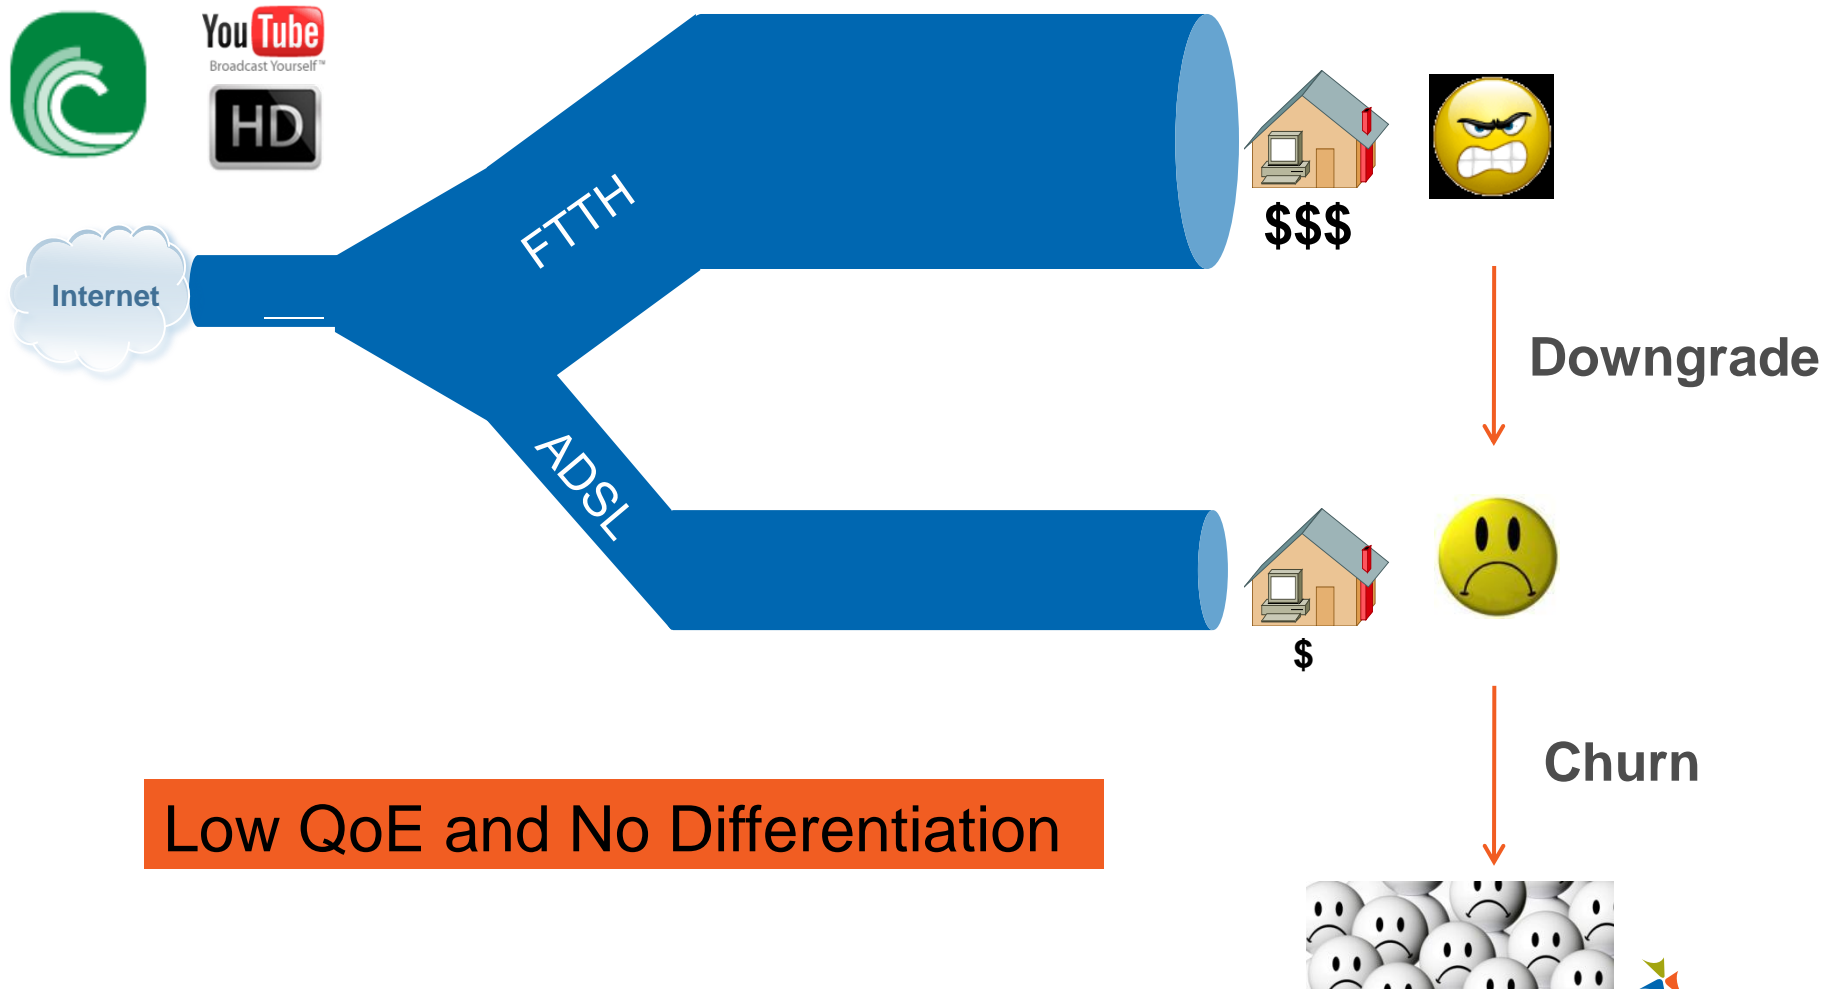

- Tier-1 operator launched FTTH network in 2006
 - Subscribers on FTTH network were not satisfied
 - Customers complaining to service center

- Deployed OverCache for P2P and Internet video cache in mid-2008 dedicated to FTTH subscribers
 - Customer satisfaction was tremendously improved
 - “...strong growth in FTTx subscriptions”
 - Subscriber count **tripled** since OverCache was introduced
 - 75% of FTTH additions are upgrades

Tiered Services Without Cache

Low QoE and No Differentiation

Tiered Services With Cache

Assured QoE and True Differentiation

Cache System Requirements

- Support Internet Video and P2P (including encrypted)
- High capacity (cost-effective) scalable to 10x Gbps
- High cache efficiency
 - Cache-hit-ratio
 - Cache gain
- Carrier grade - flexible, resilient and seamless integration into operator networks
- Hierarchical distributed cache with global control
 - Overcoming bottlenecks throughout the network
 - Bringing popular content close to consumers
- Discoverable non-spoofing cache as defined by P4P/IETF

Overssi - Revolutionizing OTT Video

Cache solution provider of choice for Tier-1 operators – fixed and mobile

Pioneer of Internet video and P2P caching solutions

Founded in 2004

40 telecom, web and video experts

Global cache expert, exponential growth

Serving 20 million users worldwide
Deployed sites of over 15Gbps

Financially sound, strong investors

Carmel Ventures, Cisco®, smac

Global presence, channels and partners

Asia-Pacific, LATAM, EMEA

Thank You For Listening
